PROFESSIONAL SUMMARY

Flutter Developer and Mobile Software Engineer with 3+ years of experience building and shipping production-grade cross-platform apps for iOS and Android in fintech and sports-tech domains. Specialized in Clean Architecture, BLoC/Riverpod, unit testing, and end-to-end CI/CD release management on the App Store and Google Play. Experienced in Agile/Scrum environments with a proven track record of performance optimization, scalable feature delivery, and mentoring junior developers.

WORK EXPERIENCE

Flutter Developer — Tuwaiq Pay

09/2025 – Present

Remote

- Built and maintained a production fintech app for iOS and Android used by real merchants for invoicing, payments, and transaction management.
- Delivered scalable cross-platform features using Flutter and Riverpod following Clean Architecture, including sub-account support with differentiated UI and API behavior.
- Led key modules: authentication, biometric login, NearPay SDK integration with localized NFC error handling, and multilingual support (Arabic/English).
- Managed App Store and Google Play CI/CD releases using GitHub Actions; resolved Android 16KB memory page size issue and handled App Store rejection.
- Collaborated within an Agile/Scrum team with backend and UI/UX to deliver a secure, high-performance mobile experience.

Flutter Developer — Octopus Software Solutions

06/2025 – 09/2025

Remote

- Contributed to SportyMate, a cross-platform (iOS, Android, web) sports management platform connecting players, trainers, and clubs.
- Implemented smart booking, real-time chat, and secure authentication integrated with REST APIs and Firebase.
- Built responsive, dynamic UIs with stable performance across Android and iOS.
- Set up CI/CD pipeline using GitHub Actions and Fastlane for automated testing and deployment.

Flutter Developer — Value Business Planning

11/2023 – 06/2025

Cairo, Egypt

- Built and maintained cross-platform iOS & Android apps with strong focus on UI polish.
- Integrated REST APIs and Firebase services for secure, efficient data flow.
- Improved app performance by 30% via profiling and state management using BLoC & MVVM.
- Wrote clean, testable code with unit/widget tests; conducted code reviews in Agile teams.

Flutter Instructor & Team Lead — GDSC - Google Developer Student Clubs

10/2022 – 05/2023

Cairo, Egypt

- Led weekly Flutter and Dart training sessions for 50+ students covering UI design, state management, and software architecture patterns.
- Supervised Flutter sub-team and guided members through real-world project development using Agile practices.
- Promoted open-source contributions and built a collaborative Flutter learning community.
